

INTRODUCING

THE FLEXX COLLECTION

MAGLIN™
Site Furniture

Define your landscape

WITH THE FLEXX COLLECTION BY MAGLIN

FLEXX is a line of stylized panels that enables one to define public spaces in a versatile and aesthetic way.

Inspired by the need to balance togetherness and privacy in our shared environments, FLEXX panels enable the transformation of a singular space into beautifully segmented zones. Perfect for creating an airy outdoor room, highlighting a row of plantings with a sunlight-filtering wall, or drawing attention to a design focal point – FLEXX panels are a design tool that responds to the heights of your imagination.

DEVELOPED IN PARTNERSHIP WITH
DESIGNER FRANK CRAWFORD

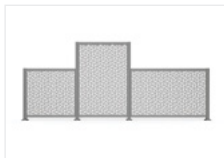

FEATURES & BENEFITS

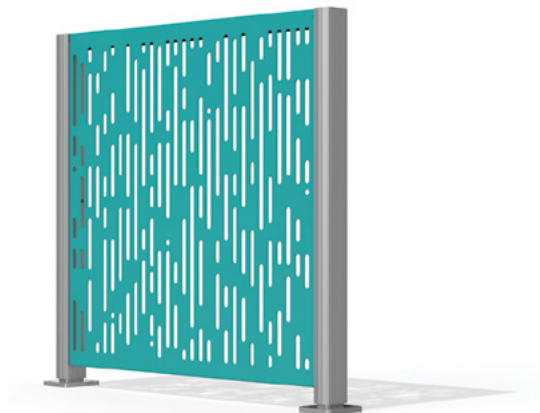

Surface mount or direct burial
installation options

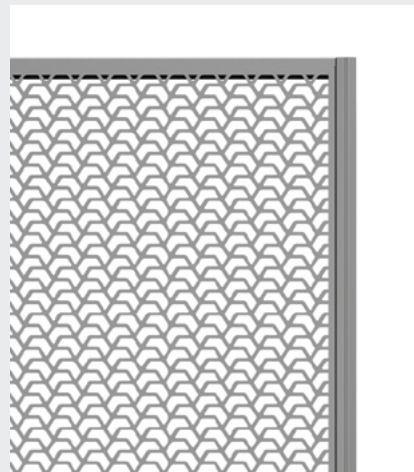

Connect panels at 90 or 135 degree
angles for bespoke configurations

Available in 3 sizes
4' W x 4' H • 4' W x 6' H • 6' W x 4' H

FABRICATED FROM LASER CUT 11 GAUGE
MILD STEEL

FLEXX posts are built using a hybrid construction, consisting of a steel structural assembly covered by a decorative aluminum sleeve.

All FLEXX panel components are powdercoated; a process involving multiple steps and applied to a prescribed thickness to ensure optimal surface adherence and protection from abrasive, chemical and climatic conditions. All Maglin powdercoat colors are designed specifically for outdoor use with high UV resistance and protection from impact and corrosion.

FLEXX Panels System are engineered to wind load:
V=115 mph Exposure C and V=140 mph Exposure B.

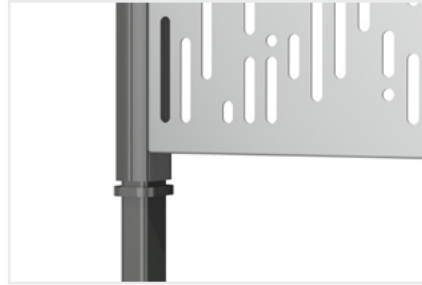

Easy installation

The laser cut steel panels are mounted on steel and aluminum frame/post system and can easily be installed. Available in surface mount or direct burial.

They can be combined in myriad configurations including the option to assemble attaching panels at 90 degree and 135 degree angles.

Our laser cut metal panels can accentuate the splendor of any outdoor setting whether it's offering artistic flair or for functional delineation.

OUR ENVIRONMENT

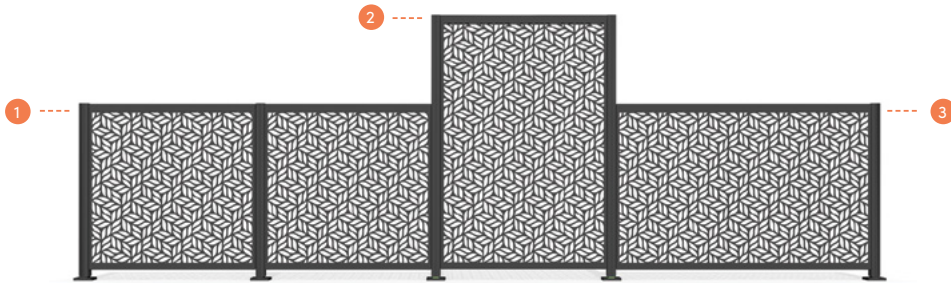

The Maglin Site Furniture commitment to quality is about more than the products we make - it's about how we make them. You receive superior long-term performance and the environment gets a break.

By using many high quality recycled materials, wood from managed forests, lead free e-coating and solvent-free powdercoating, we produce distinctive public site furniture - many recyclable themselves - that meet and exceed sustainability goals.

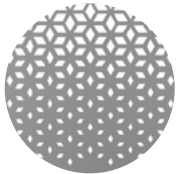

DESIGN WITH THE FLEXX COLLECTION BY MAGLIN

Featuring five panel designs – Fusion, Interlock, Kaleidoscope, Matrix and Summit, and with three different sizes to choose from, incorporate one or multiple patterns or sizes in your design.
