

# L-Series

## Introducing your new favorite L-word

Linger. Laugh. Luxuriate. Some of the very best words start with the letter L. Now you can count the new L-Series among them. This collection may look lightweight, but it's built for longevity on school campuses, in retail and commercial settings, in hospitality and mixed use.

What's not to love about that?

### Armed for support

Choose between backed and backless benches in two different lengths. Optional end and center arms are easy to add to a standard bench and built wide for maximum comfort. The mild steel formed plate follows the same lines of the bench support ends for a consistent lounging look.

“I sought to create a visually lightweight form by creating the main structure with only one piece of formed laser cut steel – a minimal structure reduced to its necessary elements.”

Geoffrey Lilge, L-Series Designer

Backless Bench

48 1/2" Length  
Backless Bench

## Lean into a clean finish

The surface mount with counter sunk bolts and anchors create a flush mount. Mild steel lasered and formed ends are e-coated and powdercoated for protection. Slats and frame can be painted to help you stand out or blend in (also available in Ipe and Thermally Modified Ash).

# L is for Legendary, too

From skate deterrents that can easily be added to a standard bench, to steel with a recycle content up to 61% that's fully recyclable at end of life, the L-Series sweats the details.

Bench Options	66 ½" Length Backed and Backless benches.
	48 ½" Length Backless - fits underneath table with easy access on either end
Table	66 ½" Length
Material	Mild steel lasered and formed ends, e-coated and powdercoated
