

MAGLIN[®]
Site Furniture

About Maglin Site Furniture

Your needs inspire our solutions.

Today's public spaces demand adaptability. That's why we offer a wide range of outdoor furniture, from benches and bollards to bike racks, receptacles and custom solutions. Our products are strategically designed and thoughtfully customizable to perfectly complement any environment.

With Maglin, you can create exceptional outdoor spaces that inspire people to connect and thrive.

Sustainability at Maglin

At Maglin we care deeply about the impact our products have, striving for a positive influence on both the natural environment and the people who use our furniture. We design with sustainability and human well-being in mind, ensuring the spaces we help create are healthy and enjoyable for generations to come.

We have initiated our plan to shape our future actions through 3 overarching environmental pillars; **People**, **Place**, and **Product**.

People are at the center of what we do, and we believe that protecting the environment starts with the choices we make. We will support this philosophy through **teaching**, **equipping**, and **encouraging** our staff to make more sustainable choices.

Place is where work happens. As we utilize our facility, we commit to making strides to reduce energy usage, water, transportation, resources, and waste as we adopt **Zero Waste** principles and continue to reduce our **Carbon Footprint**.

Product is what represents us. We believe we should be responsible for the full lifecycle of our products – from how they are made to where they end up. Transparency matters, so we use Environmental Product Declarations (EPDs) to detail materials and manufacturing processes. To achieve our sustainability goals, we understand it requires a long-term dedication to continuously re-evaluating not only our products but also our entire supply chain.

Pixel Collection

What defines the perfect space? Does it bring people together, forge new connections and instill a strong sense of community? Is it a place for colleagues and classmates to share ideas, for friends to catch up over lunch, or simply a place to be alone in a crowd?

With the Pixel Collection from Maglin, you don't have to choose. Simple in form and highly versatile in function, Pixel gives you the building blocks to design your ideal space. Using the Maglin Product Builder online platform, Pixel's playful building blocks can be digitally configured for any space, allowing you to create seating that promotes social interaction and community well-being. And with fast, easy installation and near limitless possibilities for configuration, you can design as your needs evolve—all with Maglin's signature quality, comfort and sustainability.

Pixel is now available in 4 FT blocks in both tall and short configurations with Ipe and Thermally Modified Ash wood. Wood cladding can be added to all 4 sides of a stand-alone block.

Cornered backed and backless blocks are available for a seamless configuration.

Need shade? Add a steel umbrella mount block with the umbrella post to your layout. Pair with the TUUCI umbrella or ROMA Sun Shade.

Ogden Collection

Transform outdoor spaces with the original MVP of outdoor versatility – the Ogden Collection. With its innovative modularity, Ogden allows you to tailor seating solutions precisely to your space, offering an unmatched level of design flexibility.

The Ogden Collection draws its inspiration from the success of a custom curved bench that Maglin crafted for the Ogden International School of Chicago more than a decade ago. Since its introduction, Ogden's modular design and customizable details have made it a staple of Maglin's standard product lineup.

Ogden empowers you with adaptability and responsiveness, enabling you to precisely customize backed and backless, curved, circular, and straight benches for your space. Make waves with a serpentine bench, create comfortable seating on a wall top, or make a bold statement with a striking mitered 90° corner. Whether you're planning a new outdoor area or enhancing an existing landscape, Ogden effortlessly adapts to your site's requirements. Choose from various radii, materials, and leg or mounting

options to perfectly align with your vision.

The possibilities continue to expand with the Ogden Collection! With the addition of metal tables, modular tables and integrated armrest tables, you can optimize the arcs, curves, and straight lines of your Ogden Collection bench by providing sturdy surfaces for laptops and outdoor dining.

FLEXX Collection

FLEXX is a collection of stylized steel panels that define and segment public spaces with versatility and architectural elegance.

Inspired by the need to balance togetherness and privacy in our shared environments, FLEXX panels enable the transformation of a singular space into beautifully segmented zones. Perfect for creating an airy outdoor room, highlighting a row of plantings with sunlight-filtering wall, or drawing attention to a design focal point – FLEXX panels are a design tool that responds to the heights of your imagination.

Featuring five panel designs – Fusion, Interlock, Kaleidoscope, Matrix and Summit, and with three different sizes to choose from, incorporate one or multiple patterns or sizes into your design.

FLEXX steel privacy panels are available with a gate. Combine site security and privacy with the ease of an external entry/exit point.

Urban Canopee Corolle

Redefining Urban *Cool*

Experience the future of urban cooling with Corolle. Designed by Urban Canopee, brought to you by Maglin, Corolle is an innovative solution designed to cool down cities and combat the urban heat island effect. With its innovative design, Corolle integrates climbing plants, creating lush “Fresh Islands” within the cityscape.

Corolle’s airy structure allows for optimal air flow and dappled shade while greenery filters harmful air pollutants, attracts pollinators, and enhances biodiversity in cities – all while creating a refreshing, visually striking space for urbanites.

Corolle’s elegant planter bases can be movable, transforming paved streets and plazas into pedestrianized green spaces where surrounding infrastructure might limit traditional planting. This makes Corolle ideal for urban centers, parks, university campuses, and rooftops, where flexibility in space usage is crucial.

CANOE Modular Planters

Modular planters bloom with possibility

Introducing CANOE, the modular planter system that liberates your creativity and lets you craft expressive urban landscape elements for outdoor spaces like streetscapes, roof decks, parks, and courtyards.

CANOE's versatile sections create continuous planter channels that connect to form sleek lines, sweeping curves, or dramatic turns at precise angles of 30, 45, 60, and 90 degrees. Integrate customized commercial planters and modular bench seating into any space, without the constraints and expense of custom fabrication.

CANOE isn't just a planter, it's a design partner. Building upon the legacy of Maglin's top selling modular collections like Ogden and Pixel, CANOE offers the same intuitive design experience you know and love. Unleash your creativity and shape spaces that foster connections with nature, inspire interaction and create a welcoming atmosphere.

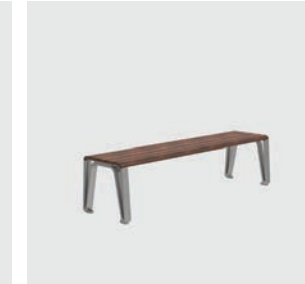

BENCHES
